OUR STORY

In the presence of the former President of México, Vicente Fox, and the then Governor of the State of Querétaro, Francisco Garrido, new company facilities are inaugurated, placing Provem in first place in terms of installed capacity for the production of Laminated Cardboard Corner Board in México and Latin America.

20 years offering the best protection solutions to the most stringent packaging, display, storage, and transportation needs in the market. A CEDIS (Distribution Center in Mexicali) is created.

Due to the growth of the ProDisplay division operation, Provem expands the production area in Naucalpan and relocates the administrative offices of the plant.

COVID 19: Thanks to the health and financial stability of the Group, we were able to maintain all our sources of employment. We achieved continuity in our productive activity as a supplier to essential sectors: food and beverages, agriculture, pharmaceuticals, laboratories, hygiene and personal care, among others.

Start of Laminated Cardboard Corner Board production

The new facilities of the Naucalpan plant in the State of México are inaugurated, due to a new production line for Laminated Cardboard Corner Board that increased the installed capacity by 150%.

Inauguration of a new production plant in Querétaro, where we start manufacturing a new project "HONEYCOMB". Opening of a business unit in the company "ProDisplay", whose designs always consider our materials in their structure, to guarantee the quality and resistance of the products we offer.

· Provem's logo evolves

· New Honeycomb production plant opens in Ciudad Obregón, Sonora.

· New Honeycomb production plant opens in Piedras Negras, Coahuila.

· We installed a new line of Corner Boards in the Naucalpan plant with the latest technology.

· New line is installed at the Tijuana plant to produce Honeycomb.

30 years

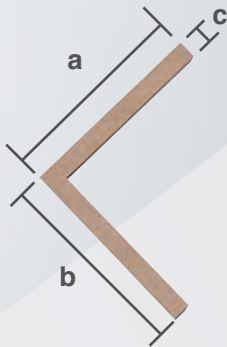

Of experience in the distribution and manufacture of our products, providing packaging and display solutions, with the largest installed capacity in Latin America.

Corner Board

The laminated cardboard corner is a product with high stacking resistance and tensile strength. It offers great versatility and adaptability to create structures and adapted to the dimensions and characteristics of your products.

The corner board piece, applied inside or outside the box, is an ideal solution to ensure that your products arrive safely and in optimal working condition. It is also an excellent option for box protection and pallet reinforcement.

- Edge protection
- Protection against strap damage
- Structural reinforcement on the inside of boxes and containers
- Reinforcement on the outside of pallets to keep them stable
- Storage efficiency
- Product safety to generate double stowage
- 100% recyclable product

ProDisplay Pop, innovative displays that improve products visibility and rotation at the point of sale.

Exhibition solutions
INNOVATIVE
WITH LARGE LOAD
CAPACITY

We design displays based on the needs of buyers, and on the originality sought by the seller. Manufactured with cardboard corners, honeycomb, and corrugated panels, to ensure high strength, quality and high impact at the point of sale.

The combination of design and multiple in-house printing and converting capabilities result in unique and creative ways to display your products, increasing sales and profitability.

Honeycomb due to its structure and combination of materials, such as liners and paper hexagonal shape cells (core), creates a surface that provides a high load resistance uniformly distributed.

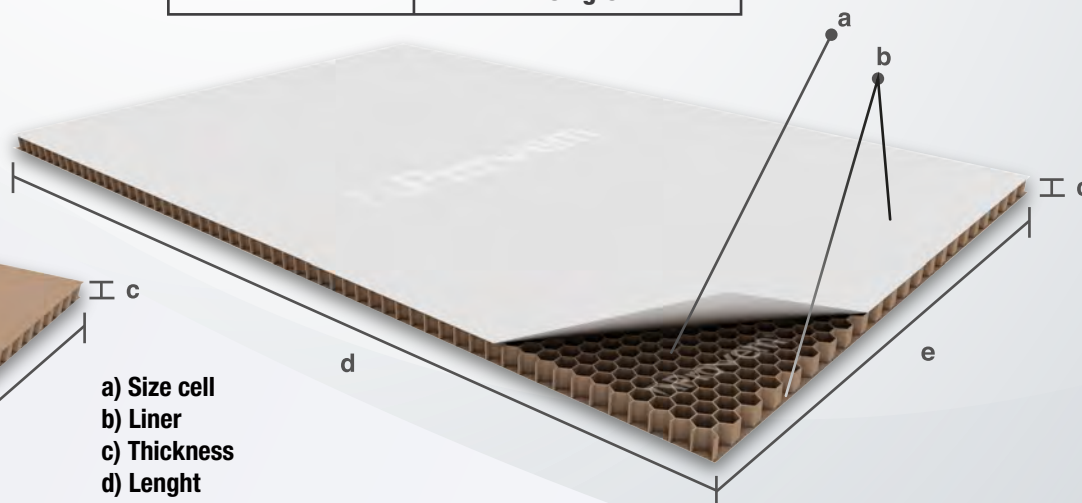

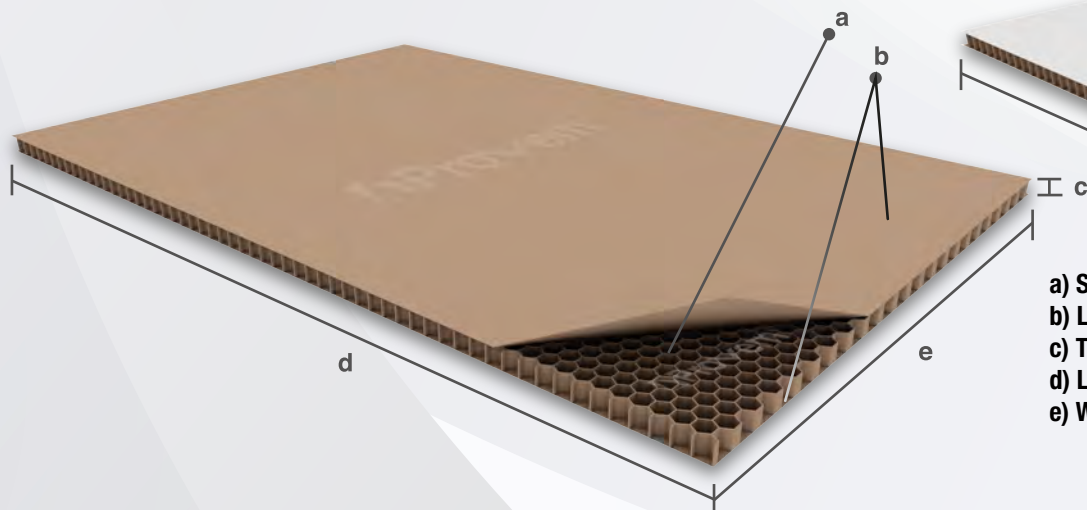

It replaces plastic and wood, making it a 100% sustainable and environmentally friendly product.

Honeycomb kraft

Size cell	1/2"	5/8"	3/4"	1"

- e) Width

Airbags

Protect your merchandise, immobilizing from the pallets to the containers and/or packaging of the products to be transported, avoiding damages caused by the movement of the transport, whether by land, rail or sea.

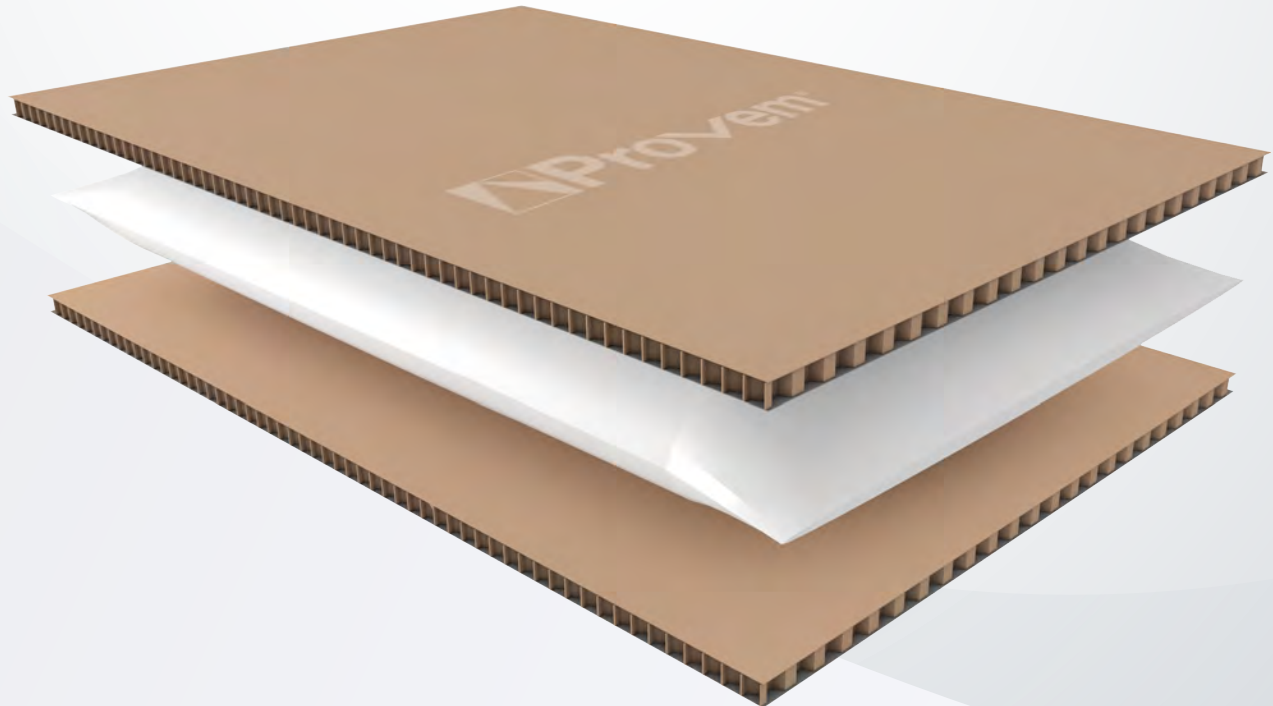

Honeycomb + airbag

Offers an integral solution by providing additional strength and support for load stability and securing larger gaps. Consists of an air bag inserted between two honeycomb panels.

- Load structure
- Stability and safe handling in transport
- Gap filler
- Protection of goods

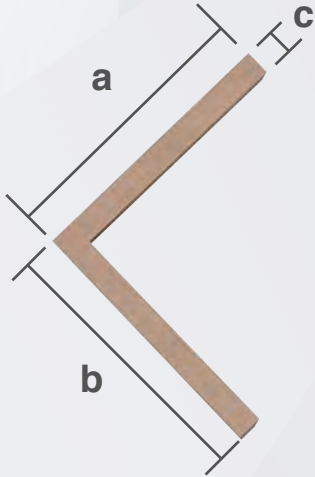

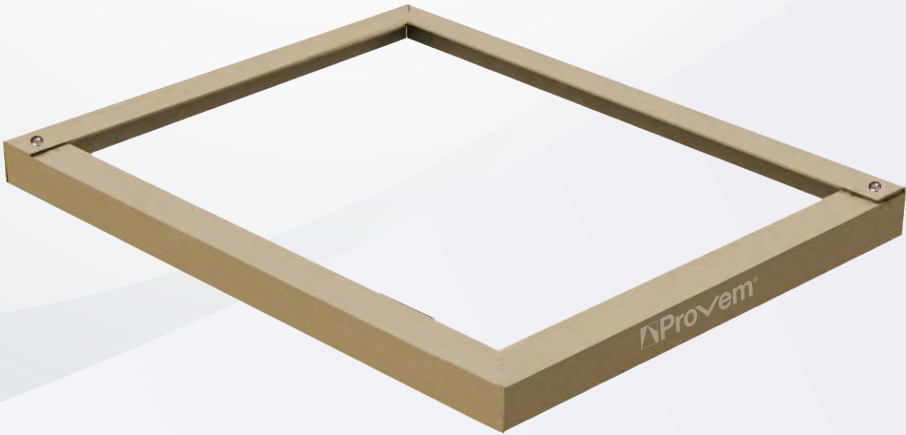

Foldeable frame

- Edge protection
- Protection against strap damage
- 100% recyclable product
- Product safety during transportation by reinforcing double stowage
- Saves packaging time
- Uniform weight distribution on the pallet
- Space saving due to its folding capacity
- Display structure
- Functions as a tray by adding a cardboard surface
- "Ready to Sell" cubes for protection of pallets, boxes, fragile items
- Protection for fragile products

Tie Sheets

Tie sheets are made of solid fiber (kraft or white paper), used to separate and stabilize different products. They can be three different kinds:

- Pallet underlay
- Pallet tie sheet
- Pallet top sheet

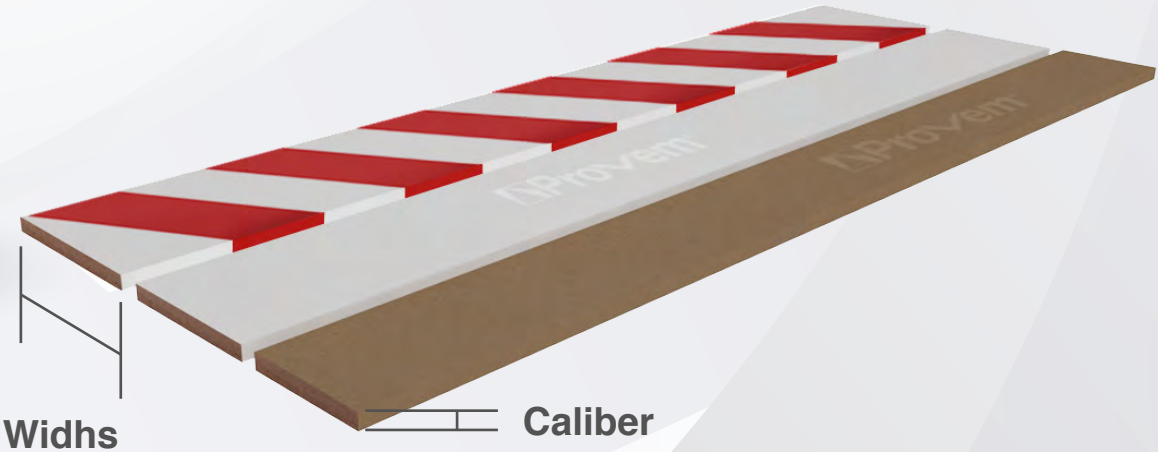

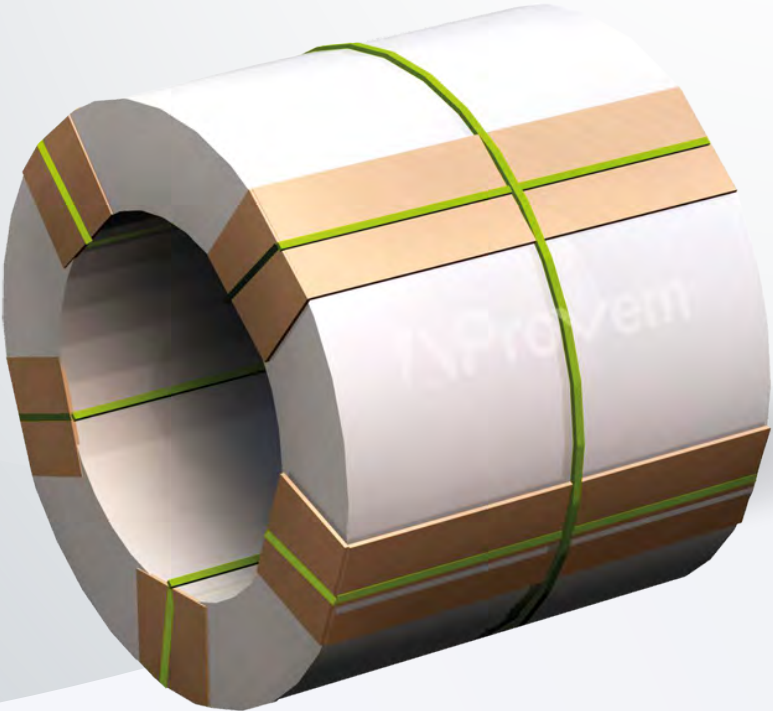

Cardboard Sill is a strong uniform piece of cardboard to be an ideal auxiliary in the separation and identification of products in batches that facilitates exports.

- Benefits of using a cardboard sill
- Protects the apex or edge of your products
 - Absorbs strapping pressure
 - 100% recyclable product
 - Protection of equipment an furniture

Widths			Calibers									Finishes

Crown Corner Board

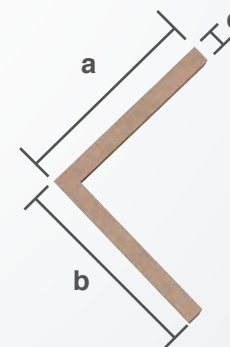

The crown corner board is made from laminated cardboard corner piece with precise die-cutting at different angles, so that it fits perfectly to achieve an angular and circular protection.

It is ideal for circumferences, inside and outside of bobbins and rollers. Useful in the manufacture of cardboard displays' structure.

Benefits of using crown corner board:

- Edge protection
- Protection against strap damage
- 100% recyclable product
- Flexibility for different uses
- Equipment and furniture protection

Widhts				Calibers			Finishes
a	2"	2.5"	3"	c	.120"	.140"	· Kraft · White
b	2"	2.5"	3"				

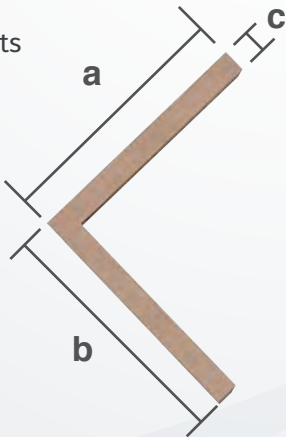

Corner Board Squad

Protects the apex or edge of your product and the most vulnerable point, absorbing the pressure of the strap.

It is made from a laminated cardboard corner, with precise cuts that fit properly to shapes and/or angular surfaces, protecting the edges. Manufactured in sizes and gauges that adjust to the needs of the product for its packaging.

Benefits of using a foldable frame:

- Protects the apex or edge of your products
- Absorbs strapping pressure
- 100% recyclable product
- Equipment and furniture protection
- Display structure.
